About me:

Major and Career Plans

Major and career plans- I am currently an Econ and Finance major, and I plan on working in the real estate industry as a developer.

Technical Background

I have taken IS101 and I am proficient with any apple device. I can also work on many PlayStation consoles because I have grown up playing on PlayStations and fixing them. I have also been trained using a POS system, mainly in a service atmosphere. I have also had to use many different apps and websites to create schedules and delegate tasks for a landscaping business. I have tried to learn as much as possible about AI but it is hard to fully understand because of how quickly it is evolving.

Non- Technical Background

While on campus I enjoy working out to fill my free time. I am also a part of an intermural volleyball team called the Purple Cobras. Off campus, I enjoy being outdoors in many ways. I love hiking and camping especially around water or mountains, which is nice because we have lots of those around us. I also hunt when possible because my family is very important to me, and I have many good memories hunting with them. I also enjoy playing video games when I have time, but I haven't had a ton of time to play lately. I love almost any comedy movie or show but a few of my favorites are all the Hangovers, The Dictator, The office and Stepbrothers. I enjoy many different genres of music like country, classic rock and some rap. But I think my favorite would have to be Yacht Rock or soft rock.
